

# FEATURED PRODUCT

## Supco®

**\$9.95**  
SHYB1YL  
HYBRID JUMPER

**\$79.95**  
SLBK10  
LINEBACKER SURGE  
PROTECTOR

### Key Features:

- **Voltage Monitor** – It will detect both high voltage, and low voltage (brown outs) and if the voltage issue exists for 3 minutes will turn the unit off preventing damage.
- **Ground Monitor** – If ground or neutral is lost it will turn unit off. (If any of the monitoring issues resolve – the unit will reset and allow the unit to operate fully protected.)
- If the unit takes a surge and sacrifices itself it turns the unit off, resulting in a service call. Other surge protectors allow the unit to run unprotected.
- The unit indicator light also flashes in different intervals which allows the technician to know the problem just by looking at the flashing light.
- It is a true voltage and ground monitoring self-diagnosing device.
- It has TPMOV technology. (Thermally Protected Metal Oxide Varistor)
- Weatherproof Type 4X Enclosure.
- NEMA rating for outside the unit installation.
