## LeakBreaker® Water Heater Shut-Off

- Protects against flood damage from the containment failure of a water heater
- Consists of a control unit, valve with actuator and sensor
- Resettable, testable protection device can be installed on any style water heater to shut off the incoming water supply, preventing additional water flow to a damaged water heater
- The multi-color LED light and audible alarm lets you know the status of LeakBreaker at all times

TSP1151

## SmartPlug Instant Hot Water Control®

- The patented SmartPlug lets you upgrade any existing hot water recirculation pump with a power cord to “Smart” pump operation
- Simply connect the SmartPlug to any 110V power outlet then plug the circulator power cord into the SmartPlug
- A sensor in the SmartPlug will record the daily hot water usage pattern in a home and adjust the circulator run time automatically
- No programming, timers or aquastats required (sensor included)
